

A close-up photograph of a glassblower's work. A bright blue and yellow flame from a torch is directed at the top of a clear glass vase. The vase is being heated, and its base is resting on a wooden surface. To the left, another glass piece is partially visible, also being heated. The background is dark and out of focus, showing more of the workshop environment.

--------------------------------	-----

Dear business partners,

I would like to thank you for your trust and helpful cooperation; it is truly heartwarming for both me and my colleagues, and it implies our commitment to continuously improve our service as well as our products. I believe that this year's innovations which I want to present to you will impress you as milestones in our existing cooperation. Let me take the liberty to inform you about major news from our Company.

Enrichment of our glass melt with titanium represents a major breakthrough in the production technology. By doing so, we have significantly improved the quality of our products as well as substantially increased abrasion resistance, which is a crucial parameter, in particular for beverage glassware. By adding titanium, the light refractory index has also improved considerably, which means that our products feature an even brighter crystal glass. We have decided to use the new, more resistant and higher-quality glass melt also to manufacture decorative items. I would like to point out that we are the only crystal manufacturer in the Czech Republic who uses this advanced technology.

Another technological innovation is evident in the new collections designed by our talented design team and we are pleased to continue our cooperation with Simon Moore. I can already promise you now that additional collections will be introduced to the market as soon as possible.

We can do many things, but the willingness of our partners to cooperate with us is always the most important aspect. We strive to understand the challenges they face in their markets. Every country is somewhat different in its nature, but the main principle of cooperation remains always the same for us – open and fair exchange of information provides the basis for a long-lasting partnership.

If this runs smoothly, even occasional problems can be easily overcome. They occur on our part from time to time, namely in situations when some of our plant installations do not work correctly. Such situations cannot be completely avoided. And I am delighted to inform you, during 2016, we purchased two more modern glass lines for over 11 million EUR. Consequently, our daily production capacity has increased by more than 100 thousand pieces and I can already promise you additional new collections of glasses and glass tumblers that will start rolling off these advanced installations. So I thank you for your confidence; and we look forward to continuing what we began seven years ago.

Warmest regards,
Lubor Cerva

Crystalite Bohemia

The Czech company Crystalite Bohemia s. r. o. was established in October 2009 and today it owns two production plants. The first is a glass factory in the town of Světlá nad Sázavou with fully automated production of beverage and decorative glass (the glass factory was founded in 1967) and the second is the Květná glass factory in the municipality of Strání (founded in 1794), where glass is still manufactured manually and is decorated by using various techniques. Currently, the company has around 1,000 employees working in the two production plants and generates an annual turnover nearing EUR 40 million. The company exports its products to more than 82 countries the world over. The sole owner of Crystalite Bohemia is Mr. Lubor Cerva, a Czech entrepreneur and investor.

The entire range of products is manufactured with the use of an environmentally-friendly lead-free Crystalite glass melt. Since 2016, on automated lines in Světlá nad Sázavou, this glass melt has been enriched with titanium, which provides the final products with greater resistance, extends their durability and underscores their crystal appearance. Crystalite Bohemia is the first glass factory in the Czech Republic – and the second in Europe – which uses a titanium glass melt in the manufacture of beverage glassware.

Available decorations – more examples available at the end of the catalogue

Clear pantograph

This technique uses the principle of etching glass that is not protected by a layer of wax. A product is first immersed into wax, left to cool down and then a pattern is engraved using panto or guilloche machines. The actual etching follows, producing a delicate pattern on the glass surface. Etching is often combined with painting.

Gold / platinum pantograph

Pantograph created decorations with gold or platinum details.

Clear engraving – diarit

Diarit is a method of machine created decorations. It uses a small diamond coated grinding wheel that engraves the desired decor under a stream of running water.

Gold / platinum engraving

Diarit created decorations with gold or platinum details.

Gold / platinum rim

Edges of glasses and pouring glasses decorated with a gold or platinum rim.

We would kindly like to point out at our **"Order form"** which we have developed for you. It is easy and effective tool for ordering our products from our catalogue.

You can only fill up the intended quantities you want to order and our form will automatically calculate all the necessary figures for you e.g. total amount of your order, quantities, volume and weight.

In the form you may also see the percentage of filling up of the container size and many other important data. You can see the actual stock status of each articles and you may also find the nearest production date of the item planned in calendar weeks marked by "X" sign. (if the "X" mark is red coloured it signifies the capacity is not available anymore).

We believe you will find this form useful because it may save a lot of time and communication having all the packaging data right away.

It will also help us to speed up the issuing of order confirmations, proforma invoices etc.

As a small bonus we are offering 0.5% additional discount for placing the orders by using this form.
